

Replimune Grants

Replimune is dedicated to developing new immunotherapies that have a meaningful impact on patient health, and to serving healthcare professionals, patients, and patient communities through education and support for disease states/research areas of interest to Replimune.

Replimune may support organizations and programs to further this mission, typically in the form of independent educational grants, sponsorships, and charitable donations. Replimune is committed to scientific and educational programs and activities of third-party professional organizations and patient advocacy groups that are independently developed and conducted by qualified education providers. To better support these initiatives, Replimune has developed a streamlined process for external requestors to submit requests for this type of funding.

Areas of Focus

Replimune considers requests to support independently developed and executed programs and activities designed to educate healthcare professionals and/or patients in areas such as: intratumoral immunotherapies, skin cancers, and solid tumors (mainly liver, lung and CRC). For general inquiries please email: grants@Replimune.com.

Continuing Medical Education (CME)

We are committed to cancer research and treatment using oncolytic immunotherapy approaches. Under Replimune's CME program, Replimune may provide funding to eligible applicants requesting support for unbiased, evidence-based, independent medical education activities targeting unmet educational needs in the areas of interest to the company.

Education grants are not provided to individuals or private group practices. In addition, provision of education grants is not conditioned in any way on the use, purchase, prescription or recommendation of any current or future Replimune product. CME submission requirements include:

- All requests must be unsolicited and independently developed
- Program furthers scientific knowledge/discourse in topics of interest to Replimune
- Program complies with applicable laws and regulations, relevant guidelines, and Replimune policies
- Program Faculty must be experts in their field
- Sponsoring organization must be a qualified, reputable charity or organization (e.g., ACCME accredited, national CME/CE conference provider, or the like)

Sponsorships

We consider requests for sponsorship to support activities or initiatives that provide Replimune with a tangible benefit (e.g., booth space, signage, etc.) in exchange for our financial support. These requests must be aligned with Replimune's areas of focus and be submitted by non-promotional, healthcare-related organizations such as academic or medical institutions, professional or scientific associations,

medical education companies, or patient advocacy groups. The initiative must also seek to advance science and/or medicine; and funding must be requested from multiple supporters, not solely Replimune.

No sponsorship provided by Replimune is conditioned in any way on the use, purchase, prescription or recommendation of any current or future Replimune product.

Charitable Donations

We consider requests for charitable donations from bona fide charitable organizations focused on endeavors that seek to improve lives via health, science, education or humanitarian initiatives.

No charitable donation by Replimune is conditioned in any way on the use, purchase, prescription or recommendation of any current or future Replimune product.

Application Requirements and Submission

- All requests meeting the required elements below must be received by Replimune at least 60 days prior to the program/event date or date by which the commitment is requested.
- Complete letter of request on company letterhead must be submitted with all the following required elements:
 - Name and full contact information for Applicant/Provider/Medical Education Partner (where applicable)
 - W-9 for US payee, a W-8BEN form or equivalent for ex-US payee
 - Full details of the request, including, but not limited to, learning objectives and needs assessment, purpose for which the funding will be used, other potential sources of funding
 - Agenda (preliminary or final)
 - Details on how educational outcomes will be measured
 - Itemized budget
- Funding is not guaranteed prior to a fully executed agreement and notification of approval
- *Note: Failure to submit the required information in accordance with these guidelines may result in a delay in processing or a denial of your request*

To submit for a grant or donation please send the required information to grants@replimune.com

Please note that submission of a request does not indicate that Replimune has agreed to fund your request. Decisions regarding funding are made only after the company has received and reviewed your complete request. You will be notified of the decision via an email sent to the address you provide upon registration. All decisions are final and in the complete discretion of Replimune.

Replimune is committed to conducting business in compliance with all Replimune policies, American Medical Association (“AMA”) Guidelines on Gifts to Physicians, the AMA Ethical Opinion on Continuing Medical Education, the Pharmaceutical Research and Manufacturers of America (“PhRMA”) code on Interactions with Healthcare Professionals, the Accreditation Council for Continuing Medical Education (“ACCME”) Standards for Commercial Support, the U.S. Food and Drug Administration (“FDA”)

regulations and guidance, the U.S. Department of Health and Human Services' Office of Inspector General ("OIG") guidance and all applicable federal and state laws and regulations.
